

“How To Boost Your Traffic And Sales With TrafficSwarm”

This Ebook comes with re-distribution rights. You can sell it or give it away from your own website. You can also brand this Ebook with your own links and earn money by giving it away. For details, [click here](#)

I bet you've probably heard about [TrafficSwarm](#).

This automated "traffic-exchange" directory can send 1000's of targeted prospects to your website, every single day, and all this for free.

Contrary to what many people think, traffic systems like TrafficSwarm CAN make you lots of money.

The trick is to setup an attention grabbing page, that provides something that people who use these traffic exchangers really want.

And in this report I will show you how to do that...

I consider TrafficSwarm one of the best online traffic exchanges because the people who click on your ads actually want to see them.

Other traffic exchanges just show you random sites which makes your traffic much less targeted.

It takes just 5 minutes to set it up, and it's totally "viral".

- Here's how it works in more detail...

You set your web browser's start page to your unique Traffic Swarm URL.

When you open your browser your start page is displayed, like you can see below:

The screenshot shows the Traffic Swarm website interface. At the top, there is a navigation bar with the following elements:

- Navigation:** A "NEXT Go" button and instructions: "Click the links below to earn credits. Click the Next button above to see more links."
- User Information:** "Login ID: 453455 Credits : 3402".
- Search:** A search bar with a "SEARCH" button.
- Member Options:** Radio buttons for "TrafficSwarm Member Sites" (selected) and "Web Using ExactSeek".
- Logo:** "TRAFFICSWARM" logo with a mouse cursor over it.
- Legend:** A red circle icon followed by "= Pro Member Link".

The main content area is a grid of eight text advertisements:

- 1. Digital Automated Business Systems ***: "Digatal Automated Business, No Selling Not MLM, This Works Like Crazy Easy \$3500 a Week You'd be Silly not to take it"
- 2. Create wealth one step at a time. ***: "Stairstep Systems is based on the simple concept of finding 3 Partners that will commit to create wealth no more than that."
- 3. Water 4 Gas ***: "Water4Gas emerged and evolved in a year from a small home-based biz to become a global junction for waterfuel technologies"
- 4. Free Home Based Business ***: "Tired of working for the man? You can start Your Own Business for FREE. With full support. Let us show you how."
- 5. Email Marketing Secrets UNLEASHED... ***: "Discover exact Email Marketing Strategies that one guy used to generate \$291,756 and 44,901 Opt-in subscribers in 30 day..."
- 6. Absolutely Every Member Gets Paid ***: "You will be paid commissions on your very first day joining. Guaranteed. No sponsoring required to make money."
- 7. Study Dotcomology-Click Here Now ***: "Don't Pay a Dime For Any Ebook, Marketing Course, Software Program or Anything Else Until You've Read This..."
- 8. He's at it again ***: "See what He is going to succeed at this time."

At the bottom of the grid, there is a box titled "Have You Seen These Videos?" containing the text: "Michael made \$274 in less than a day ... and he only used one of three ways to make money with this program. Step-by-step blueprint."

The top frame contains the Traffic Swarm controls. The bottom frame contains 8 text ads. You get credits when you click on one (or all) of the text ads.

You must spend 20 seconds at a site to receive your credits. A timer in the top frame counts down the seconds for you.

You can move to the next page of 8 text ads and go on from there. By earning credits you get your ad(s) shown throughout the Traffic Swarm Network.

* The premise of this system is that some members will have their interest peaked while surfing, and sign up for a product or service from one of the TS member sites.

You can also earn credits by referring other people to Traffic Swarm.

By doing this you create a downline so that you receive credits when those members you referred themselves refer other people.

If you don't feel like surfing you can simply purchase credits.

You can also enter the credit lottery every day and buy "tickets" using some of your credits.

There is also the option to upgrade to a paid Pro account.

The advantages far outweigh the monthly cost of \$30.

For one... you receive 2500 free credits every month. (If you were to purchase 2500 credits it would cost you over \$40.00.)

You also earn more credits for referring members, you get more credits for surfing, and your site(s) get rotated in the Featured Sites section and will also be included in Traffic Swarm link boxes throughout the network.

You also get to promote an unlimited number of URL's. The free membership gives you 10 URL's max.

So if you are involved in several affiliate programs you'll want to have an unlimited # of URL's and ads at your disposal.

You also get priority ad reviews. All ads are reviewed before they go live. If you are a Pro member your ads get approved sometimes within minutes.

Free members have their ads reviewed in 24-48 hours.

The Pro Membership is definitely worth checking out if you want to increase your traffic to your website.

Sign up for a free membership first. You can always go for the Pro Upgrade at a later date.

I've been using TS to pile up all kinds of leads and profit across various niche markets. It's not hard to do and it's 100% automated once you get set up.

The only tools you need are some basic web design skills (this can always be outsourced) and a follow-up autoresponder account.

I highly recommend the [Aweber](#) service. It's the one that most online marketers use, and they offer great support if you need any help.

To effectively use TS you have to do what 90% of TS users don't do... and that's to **generate leads and build a list.**

Sending traffic to affiliate links or blindly to a sales page is not a profitable business model.

You should always think of TS as a "**lead generating tool**" and nothing more.

Never expect "blind" sales from TS.

Showing TS users your latest product will not bring you any profits.

No matter how great the sales copy may be.

No matter how flashy your sales page looks, or how many bonus offers you include...

TS users will NOT buy your stuff.

And here's why...

Most TS users don't know you.

They have no clue know who's behind the sales page that they see, and with all the online scams these days, it's hard to convince people who've never heard about you that you're for real...

TS users are tired of seeing all the new offers over and over again while they earn surf credits.

They use the TrafficSwarm system to earn traffic to their OWN sites.

They agree to give your site a short look, but inside their head they think...

"Hurry up, close this damn page, I need surfing points..."

It's a very selfish behavior, if you think of it.

But don't let that discourage you because TrafficSwarm can be VERY profitable for your business. I will show you that in a minute...

Below is a screen shot from my statcounter service, showing all the traffic that came in from TrafficSwarm to one of my list building pages:

As you can see, it's worth to give it a try... and you have nothing to loose, because setting up the system is free.

Now, let me show you how you can really benefit from TS...

But first this you need to understand this...

* To turn TrafficSwarm into a profitable lead generator, you need to treat it like a direct mail campaign.

You should setup a simple squeeze page that is targeted to your niche category.

A squeeze -or lead capture- page is basically a simple, quick loading site with an attention grabbing headline that forces you to hand over information in exchange for something you want!

You can offer a free guide, special report, trial offer or something else of value to the TS visitor that is ONLY available by email, in return for their email address.

You can give away a copy of this Ebook, in return for their details. To download the squeeze page that comes with this Ebook, [go over here](#)

If you don't have anything to offer, you can download a whole collection of Ebooks and special reports with resell and re-distribution rights from the [Info Products Vault](#)

Many people that use Traffic Swarm are trying to promote their own websites, so you have to be able to catch their attention before the countdown ends and they are off to get another credit.

If your site can help other TS users promote their sites -or learn how to get more traffic- you will do well.

Your best bet is to create an attractive squeeze page and a good incentive for the user to give you the email address.

Make sure your entire offer is placed "above the fold" (so they do not have to scroll down the page to see your complete offer.)

Now, you should not refer your visitors to a download page after they submit their details...

The link should be sent to them via email instead, so you are guaranteed to get double opt in subscribers. (The people who are too lazy to confirm are not going to do you any good anyway.)

If you don't know how to create a squeeze page, you can download a free copy of the easy to use [Instant Squeeze Page Creator](#). This tool will quickly generate a squeeze page with graphics, and you can always edit the squeeze page later in your html editor if you don't like the final result.

Example: You can also use a Special Gift Box on your squeeze page, like the one below:

Free \$97.00 Value
Info Products Vault

Get Marketing Products For FREE with "No Strings Attached"

A \$97 value! Get it now!

[Info Products Vault](#)

Remember to not send TrafficSwarm visitors right to the sales page.

Insert a special sign up autoresponder form below in the page to collect their name and email addresses first, before you send them to the (free) membership site.

✓ If you want to use the special code for this box, and earn money when people visit the membership site, you can get it [from here](#). (You'll find all the instructions about how you can make money with the affiliate program inside the members area.)

Setup your follow-up responder to send the gift out immediately and then follow-up over time with related information.

Once you build a list, you can gradually "refer" your readers to your own products, services, affiliate programs or whatever you are trying to promote.

Ideally you would provide in depth reviews of any 3rd party products and services you are promoting.

Ask your subscribers what they are interested in, what kind of reviews they want to see, what their biggest questions are.

You'll have all the input you need to continue carefully crafting your follow-up messages to give your subscribers exactly what they want.

Believe me... the money will come soon.

Remember... just forget the "cold sale"...

Focus on building a steady list that you can build a relationship with.

You'll discover that your "long term" profits will shoot through the roof.

To Your Website Traffic And Sales!

Dirk Dupon
editor@ebooks-made-easy.com

=> NOTE: It's important that you don't insert any Google AdSense ads on your TS page. Google will ban your account if you do THIS, as it is not within their rules.
