Andrew Fox ([click here to order](#))

“Discover How A Rogue ClickBank Warrior Generated \$40,000.00 In Commission In Just A Few Days - With Someone Else's Product And While Slacking Off At The Beach!”

If You're Looking For The Real Way To Power Up Your Finances, Build Your List And Pull Down Massive Affiliate Pay Checks Then Bolt The Door And Get Ready To Listen Hard... Because This Is The Kind Of Information They'll Never Teach You In School

By anyone's standards Andrew Fox is having a great year -

Actually you could say he's been having an 'exceptional' year. He launched a string of best selling products and blew away the competition in practically every affiliate promotion he took part in.

And we're talking 'big' numbers - With the income generated from a few affiliate promotions he just bought himself a new house by the sea, ... and rumour has it, he's just splashed out on a new Ferrari 355.

But here's the crazy thing - He's winning these affiliate contests and pulling in commissions of \$40K and more, even when he's away from the PC travelling the world and having fun!

How the heck does he do it?

We'll in a 'tell all' interview with Simon Hodgkinson and Jeremy Gislason, Andrew finally spills the beans about what he's been doing to generate these incredible results and live the 'Rock star' lifestyle.

And the answer is simple - leverage...

Could anyone do the same as Andrew?

He thinks so, and during the course of this exclusive interview he explains this powerful tactic in detail. And how you could apply it to your business.

And when you start using the power of leverage all kinds of crazy things can happen - Only a few weeks ago Andrew took a \$200 resell rights product and turned it into a \$25,000 sales payday.

And he's done it over and over again!

Andrew's been selling online since 1999 and has generated millions of dollars of personal sales during that period.

He's the creator of the highly informative Marketing Quickies videos 1 & 2, the Millionaire Mega Yacht DVDs, the best selling Dominating AdSense course, Dominating ClickBank and more.

If you want to put your online sales into overdrive and become a force to be reckoned with then this interview is must hear information...

Here's your chance to learn from the best...

Now before you think these are fancy "guru only" tactics - Let me assure you - almost anyone could do this.

And because Andrew really 'walks the talk' you'll hear about facts and reality not hype and theory. Yes, its true. Andrew Fox is a genius marketer - a legend even...

... And when he sold more copies of the recent 'Day Job Killer' package than almost any other affiliate he set himself apart as a force to be reckoned with.

For the record: In that promotion his total sales were over \$65,000 - netting him \$40,000 in commissions.

Can you imagine what you could do with that sort of income on a regular basis?

But it wasn't because of the size of his list.

It wasn't because of the bonuses he offered.

It wasn't because he was a brilliant email copywriter.

It was actually something really simple - relationships.

Yes, relationships with marketers, his subscribers, and other people who helped with the launch helped him generate that kind of cash.

Even more important than HAVING those relationships was how he worked with those relationships to create massive results.

The best part of all this is that you - yes, you - can do the same.

You don't need a massive list or huge JV partners, you don't need your own website, you don't need your own products (although that does help with part of the process, as Andrew will tell you).

You just need to act like a human being, and be generous in the right ways.

Build excitement the right ways. Market things the right ways.

“Discover The Battle Tested Strategies Learned From His Tough Military Training That Transformed A Self Confessed, 4x Times Loser Into An Internet Marketing Superstar!”

If You're Looking For The Fast Track Techniques To Product Launch And Marketing Success You'll Find Them All Here . . .

Jason James had hit rock bottom - He watched helplessly as his brand new sports car was being towed away by the repo man. . . He was getting daily calls from the debt collectors, his account at the bank was a deep shade of red - Worse still his 4 credit cards were simply maxed out . . .

Could it get any worse? In a word YES. . . He got fired from his job and his girlfriend of 3 years walked out, leaving him with the words 'loser' ringing in his ears... in his own words he had 'the worst attitude anybody could possibly have'.

So what happened, what turned it around? - Within just a few short years life for Jason is so far removed from the dark days he probably wouldn't even recognize his former self -

He's flying high..

Now he's a highly accomplished and sought after speaker, a top gun marketing consultant with expertise in membership site creation, internet marketing, joint ventures, product launches, motivational tactics and strategic planning. And most recently he's training marketers around the world how to increase their order rates by using audio and video online.

We had to find out his secrets.

We needed to discover the mindset change that has brought him to these incredible successes because we knew it could help so many other people...

And because Jason decided to talk openly you now have the chance to share in this life changing information.

If you sell anything online you owe it to yourself to listen in to this call . . .

Here Are Just A Few Of The Things Jason Reveals:

The 4 key elements of mindset he learnt in his four years duty as a US Army Marine that transformed his life and gave him the power to create a string of successful online businesses.

How he got started working evenings and weekends to become an eBay power seller and the 'mind-switch' that rocketed him to online success.
How his first 'big' product actually created itself and how you can use this information to create a string of highly successful products.

The three critical elements you must monitor in any successful launch (any one of these could let you down big time and cost you tens of thousands of dollars...it happens all the time, don't become a statistic)

Jason's secret tactic that helped one of his sites generate over \$300,000 in less than a month and why exactly it worked.

How a new launch pulled in over \$100K in one day despite going up against massive competition (He also talks about a late night frantic phone call with another marketer that made them both thousands)

The real reason why you must build membership style products - And the tactics to keep people paying month after month

The two golden rules you must stick to before you launch any kind of product

The three strategies you must apply to get your JV promotions noticed (Jason used these to recruit 30 top marketers who not only marketed his product but they actually created it for him)

The sneaky forum marketing tactic you can use to build a buzz for your product launch

Why Jason now uses video on his sales pages and how it can instantly help you build trust and rapport with your own prospects

Why you must consider outsourcing if you're aiming for six figure launches - (Jason reveals exactly what he got others to do, why, but most importantly the tasks you must do yourself)

And Much, Much More . . .

Jason Potash ([click here to order](#))

“There's Only One Sure-Fire Way To Get Massive, Passive Traffic To Your Sites & Sales Pages!”

And Jason Potash Is Here To Show You How.

Many online entrepreneurs face the same struggle every day and chances are strong that you might be dealing with this right now...

You have your website, your product, some killer sales copy & a hot affiliate program. You have everything in place, ready for thousands of buyers to beat a path to your door. But...

They never come.

Maybe a few hits here and there, but not enough. No sales.

Worse still, maybe you lose a few hundred dollars on pay per click advertising.

Sometimes you may get a slight advantage and set up a few joint venture mailings but that bring 5-10 instant sales, and nothing more.

It stands to reason that you'd begin the doubt process (and often yourself) ...

Is it your product just isn't good enough?

Is it your sales copy that's failing miserably?

Is it your offer price, should you sell lower?

Maybe the price... Or the delivery... Or maybe there's just no market for your product, and you just wasted all this time!!

Stop! Chances are none of those things are the real problem, because without any traffic, you'll simply never know the answer to any of those questions. The only way to know if all of those things are working is to test and guess what...

Testing requires traffic.

Your product could be the next big thing...

Your copy could be brilliant, enticing and a guaranteed order maker...

Your offer could be the best on the market...

Your price could be the most reasonable...

But none of that matters a jot if NOBODY sees it.

And that is where Jason Potash can help.

See, years ago Jason was a software engineer. He was the best of the best when it came to building online software empires.

He had articles syndicated everywhere offline, and his name was THE name in the software industry. One day, out of the blue, he decided to put some of his articles online...

And the Internet has never been the same.

Almost instantly, his articles were picked up by search engines... Slowly, as he built upon that momentum, he started getting more and more traffic.

When he finally released his very first solo software project, it was an INSTANT hit.

Not because he had the next big thing, or the best copy, or the best offer (although it was pretty irresistible!) It was because he had built a reputation for himself, and a source of passive traffic from his articles.

And now, Simon Hodgkinson and Jeremy Gislason managed to secure the interview that can make a real difference to your online success - They have cracked open his brilliant mind!

And in a very special audio interview, Jason will tell you...

The WRONG way to do article marketing - Hint : Many marketers are doing this right now!

The subtle patterns found in successful content sites that you can apply to YOUR articles - getting you ranked faster & higher than ever before!

The powerful knowledge that Google contains - and how with one click of your mouse, you can have it at your fingertips.

How being specialized & technical can HELP your search engine rankings!

The "hybrid" approach to article writing that can take your results to the next level.

How taking just a few minutes to develop a strategy can multiply your profits instantly.

How to ethically steal other people's traffic - and have them thanking you for it!

How the wrong article directories can actually hurt your efforts (even if you submit to the "right ones", too.)

Big Brother is watching you - Jason will tell you how to use this to your advantage.

Why determining where to submit your articles is more important than the when, why or how.

How keywords with fewer searches can actually bring you MORE traffic & more sales.

and so much more, you'll think you hit the traffic GOLD MINE!

Michael Cheney

"Discover How To Make More Money From Typing Up A Single Email And Hitting 'Send' Than It Takes Most People To Earn In A Year!..."

Michael Cheney Went From 0 to 20,000 Subscribers Without A Product, With No Ad Budget, With No Affiliates or JV Partners And In Less Than 12 Months... Today He'll Reveal How You Can Do Exactly The Same

And Then How To Take That 20K List And TRIPLE IT For MASSIVE Profits!

As An Online Business Owner The Single Most Valuable Asset You'll Ever Own Is Your Own Responsive Mailing List

Just ask any successful direct marketer and they'll tell you "The Money's In The List" and that's because without one - you're going nowhere...

But just what exactly do they mean by 'The Money's In The List'? And how exactly should you go about building one so that it will guarantee a flood of orders in your inbox every time you send an email?

Well Michael Cheney knows the answers - Michael started out like almost every other marketer online - He had no advertising budget, he didn't have an address book filled with 'guru' buddies to call and send him some traffic - Heck he didn't even have a product to sell...

But he built a list... And in less than 12 months his list had gone from zero to over 20,000 subscribers (and you're about to hear about the single tactic he used to do it.)

But then Michael hit upon problem number 2 - his list wasn't making him any money... It simply wasn't responsive to his promotions - (And that's a problem that's a lot more common than most people think) -

FACT: Owning a 'big list' doesn't guarantee you'll make any money.

The problem is (and this applies to any 'niche' you're in) competition is fierce and everyone is competing for the hearts, minds and the wallets of your potential customers. It's why building in the first instance is important, but more importantly, building the 'right kind' of list and managing it well is vital!

In reality, just knowing how to build a list is not enough, (unfortunately most ebooks, courses and training on 'list building' only cover half the story)

Maybe you've already started to build your list and you're only too aware of this problem? Or maybe you just want to get it right first time round and save yourself months (or years) of trial and error?

Well that's good news because today you'll discover the real secrets to list building and generating list profits directly from Michael himself...

Presenting....

The easy to copy strategy Michael used by to rocket his list from 0 - 20,000 subscribers in less than a year (with no money, no partners and no product!)

Why the size of your list is NOT the most important factor for making money online - (if you think it takes 100,000's of thousands to pull in 'big money' you'll be shocked!)

A single crucial factor that separates the supercharged 'master list builders' from 'average Joe' list builders (understanding this one concept could add extra 00's to your bottom line this year)

How to develop the 'winner' mindset necessary to run hugely profitable 5 figure+ email marketing campaigns (Most marketers are 'thinking' wrong and fail to generate income as a result)

The 5 most powerful strategies to turn a trickle of subscribers into a tidal wave (anyone of these could literally double your list size within just a few short weeks)

A simple '30 second tactic' to guarantee an increase in the numbers site visitors signing up to your list (this is so easy it's almost criminal that 95% of marketers don't do it)

Discover Michael's 4 'Must Have' tools you need to get both subscriptions and cash pouring in to your accounts.

2 kinds of 'freebie' or incentive you can create, cheap and fast (but that have a very high perceived value) that will have people queuing round the block to subscribe to your mailing list.

Discover the 3 main elements Michael recommends you should test to improve the responsiveness of your sites (these are quick and easy and testing just these 3 could be a huge time saver)

The essential rules to follow if you want to turn your 'freebies' into mouth-watering bribes that'll be irresistible to subscribers.

The tactic to sending out promotions for products you haven't personally reviewed (as an affiliate, this tactic will allow you to maintain vital integrity with your list)

Discover the trick to creating pop-up subscription forms that work - (get this wrong and you'll just annoy your site visitors)

A sure-fire tip to bring in an instant flood of residual income.

The simple 'focus switch' you need to make that guarantees happy subscribers and long-term profits

The 4 list killing mistakes to avoid like the plague (be careful the next email you send could fall into this trap)

“What Will Happen To You And Your Family When The Company You Work For Decides To 'Down-Size' ?”

If right now your only source of income is a employee's salary you need to sit down and ask yourself some very serious questions..

I apologize because I know that's quite an alarming headline, and while it's not my intention to scare anyone it is my intention to get you to start thinking - 'what if..?'

Let's face facts - the world around us has changed - It's far removed from the life our grandfathers experienced... Unemployment, 'down-sizing' and redundancy (whatever you want to call it) is a permanent fixture in our lives. 50 years ago you could easily rely on staying in a secure job but today, with short-term contracts, outsourcing and major upheavals in the job markets there are no guarantees for anyone.

Wouldn't it be nice to have a safety net in place?

Just take a minute and think what you'd do if (for whatever reason) your current income suddenly dried up? And I know it's easy to dismiss the question - But tens of thousands of people are hit with that awful scenario every single day (and they probably thought it would never happen to them either...).

But sometimes there's far worse than losing a job...

Maybe your job is secure for now, but if you feel like the majority of employees, chances are you're probably unhappy doing it... And you're not alone, far too many people feel their workplace is just sapping the life out of them?

Are you really 'happy'?

Imagine yourself just 5 years from now, is your life a great place to be? Are you financially secure? And importantly, will you be getting everything you can out of life - In that mental image are you financially free, worry free, debt free - Will you be truly fulfilled and enjoying life with a passion?

You could be . . . Expert life and business coach, Richard Butler believes that everyone has huge potential but it's often largely untapped. He believes that everyone has the power to be great; they just need to believe it themselves.

Keep reading to discover how you can transform your world (and your fortunes) just by changing the way you think . . .

Here's just a little of the advice Willie shares in this call:

Resources

If you are serious about setting up “shop” as a Web Earner then you need the right tools. You would expect a mechanic to have the right screwdriver, wrench, and be competent.

So, you need to have the right tools and understand how to use them...without them you are not even a contender. Take it seriously – and it will pay you back in rich rewards BUT if you are treating it like a hobby then you are paying for the experience.

The problem when starting out is which service provider to go with. I wasted a lot of time comparing reviews and prices, as everyone does. But I just wished someone said, “Look, just sign up to these service and get this and that, and you are set.”

It would have meant I would have started earning sooner!

So here are my recommendations. I have used them all. These are “good” companies, I say “GOOD” but, your experience may be different from mine. You may find them useless or great! However, they have worked for me. If you start analyzing every detail of an offer you will never get started.

I never fully understood until now when all the gurus and experts say “just do it” or “take action”. It is not until you actually go through the process from start to end will you appreciate how all the pieces fit together.

So, if you are new to this game, I urge you to use the Squeeze Page System to get yourself set up; because it covers all the important elements.

To set up you will go through buying a domain name and hosting, an auto responder service, understanding the use of the sales page and the writing style, the use of the opt in forms, how someone is added to your list and simultaneously shown the thank you page, the destination page (The Squeeze Page System) etc....

Just have a budget in mind and the MAIN features you NEED.

Yes, I have compared hosts, “look that has 10 GB more but less bandwidth, but the other host offers unlimited domains, etc..” **The fact is normally you never use up the web space and the bandwidth.** By the time, you KNOW you need more of everything, you would have a business bringing in tens of thousands of dollars a week – and price will not be an issue...by then you would have a dedicated server. ☺

Domain Names

My advice is to have your domain name separate from your hosting, so you have complete control.

[Godaddy](#)

This is the biggest registrar in the world. They got there by offering good deals. They certainly believe in marketing...see how busy their website is. It can be very confusing for a beginner but once you know where to click logging on and changing details on your account is very easy.

They also offer cheap hosting – ideal for beginners, but Godaddy hosting doesn't allow easy installation of certain scripts or easy access to hatches. At the end of the day you may find Hesitator a better long term choice

[NameCheap](#)

This is an easy to use domain registrar. Prices are good and their DNS system is instant. So, you can buy a domain name then change the nameserver address to your webhost and set up a new account in a minute. Your domain will be alive by the time you typed in the URL in your browser!

Hosting

[Hostgator](#)

A very popular and reliable Linux service that uses industry standard Cpanel – which means you can use all the best scripts available for Web Marketers. Has FrontPage extensions if you really must use FrontPage! Good support - they actually reply.

But, if you choose the wrong host you will waste a lot of time trying to make things work, and it will end in tears of frustration. I know, I have been there.

[Host4profit](#)

This is hosting has all the features all web marketers requires and more, it is also part of the Warrior Forum – this is THE forum for all marketers. You MUST join this forum. Includes Plug-in sites...sites that are ready-made for you. You will get lots of support here.

[DreamHost](#)

A well respected host and employee owned and GREEN. They are carbon neutral... that doesn't stop them offering excellent hosting deals. No Risk 97-day money back deal. Totally honest enough allows bad posts about them on their own discussion boards. (Please note : ALL web hosts are not perfect, take all good and bad comments with a pinch of salt!)

Looking for a reliable Auto Responder?

There is no point in having a squeeze page without linking it to a decent auto responder service. The most important factor is deliverability and usability. Look beyond the price and the sales patter. Only large operators can survive in this market and you want to deal with the best - as your business depends on their quality of their systems.

[GetResponse](#)

Unique features allows you to assign your own domain in the email links and accepts single opt in (handy feature to collect emails from customers when a sales has occurred and if they already have been through the double-opt in process. The workflow is straightforward and user friendly.

[Aweber](#)

Another firm favorite with all marketers. A Host of features including automatically producing popup and pop-uppers when you create the form for the opt ins. The interface has been updated and is more user friendly.

The above services [GetResponse](#) and [Aweber](#) are the only one you should consider. There are other services but don't be dazzled by all the extra features you won't use.

The Squeeze Page Success System – Video Edition

Simply use it to discover how easy is to set up your own Squeeze Page & how to combine it with your auto responder.

Once you understand the process you can apply it to any product or service. Comes with Video Tutorials, and the Report is Rebrandable

[Click here now to download your own copy of the Squeeze Page System and use it to increase your web income](#)

Tracking Solutions: to monitor performance

It is vital that you track everything link that is clickable and every web page. If you mean to make money you need to know what is working and what is not. Warning – make sure you have the right web host – you will need MySQL and PHP...check out the recommended hosts.

It is important to track and test and test and keep testing... otherwise you are throwing money down the drain...

DIY TRACKING – SOFTWARE YOU INSTALL

[Adtrackz](#)

You have to install this software on your website. You can track, cloak, make sticky, split test. A good all rounder. Comes with helpful installation instructions. I use this to track my squeeze pages.

[Splitting Analyzer](#)

This tool provides more detailed analysis of what you are doing. You can test headlines, subhead lines, colors, fonts, images etc..

This is another essential tool of the trade.

SERVICED TRACKING – SUBSCRIPTION

[HyperTracker](#)

This is a service you can use to track all your campaigns with ease. No need to install any software it all works from their servers - so it can save you a lot of time and money. All you have to do in to place a bit of code onto your page you want to track – allowing you to tracks clicks per page or calculate the cost in a pay-per-click campaign. 14-day free trial to test it out.

[AdMinder](#)

This is similar service to Hypertracker, also offering 14-day Free Trial

My advice is to sign up for BOTH the Free Trials and place the codes on your squeeze pages and test the services out. Only then... can you compare usability and quality of information. So set up your squeeze pages now on your website.

All-in-one Solutions

If you want to have everything in one place then you need to have the best Shopping Cart System.

Don't get these confused with other "Shopping Carts" . Here you can sell your Digital and Physical products, AND build up your mailing list using their Auto Responders.

You need to link up with Paypal and WorldPay and other Merchant Services. You want everything to be automated... that's how it should be...leaving you time to make more money or spend it with your family

So, when a purchase is made - your customer is AUTOMATICALLY switched across to another list – so you can send out TARGETED messages to people who have brought form you and those who are still looking.

MarketersChoice

All the web tools you need in one place. But does NOT offer hosting of your website. You can have as many websites that you want linking it to the Shopping Cart and have UNLIMITED Mailing Lists. You don't have to install any software on your web site all you have to do is create a sales web site and when the Order button is click then customer is taken to the shopping cart area - then your customers can download your eBook via a encrypted link. The site has been mad little more user friendly, but still can overwhelming for beginners. [30-day free trial offer.](#)

Third Sphere Host

This host has it all ...it combines the tools of Marketers Choices with web hosting. At a very reasonable price. It does offer some very handy scripts that only work its site. It has the famous PDF on site branding script for you to create your own viral PDFs. (Learn more about [creating PDFs here](#))

Earn while you Learn

[Web Master Skills Tutorial Videos](#)

Everything you need to know to be a successful Web Earner. These Step-by-Step Videos will show you the fundamentals all Web Earners should know.

Watching and learning from Videos Tutorials is fun and easy. You don't have to be an expert, but you should at least know how to change a few line of text on a web page.

If you want to get started quickly

[Sitesell](#)
